2	Machine Learning with Python	Coursera	2025	3 Months	AI / ML

12. Additional expertise:

Began my application development journey in the second semester of my university studies, collaborating closely with my university team on diverse academic and practical projects. Gradually expanded my technical skillset through consistent hands-on practice and real-world problem solving. As a freelancer, worked directly with fellow students to gather Final Year Project (FYP) requirements, designed system workflows, and developed customized software solutions. Successfully delivered fully functional projects within defined timelines, ensuring quality and usability. These experiences strengthened my technical proficiency, project coordination skills, and client communication abilities, preparing me for professional software development environments.

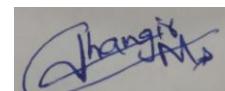

PROJECTS:

- Customer Grouping from E-Commerce Store to Improve Sales Using Machine Learning
  - ✓ Built a customer segmentation model using clustering techniques in Python.
  - ✓ Designed a Flask/Django interface for visualization.
  - ✓ Used Scikit-learn, Pandas, Seaborn, and Matplotlib for data analysis and display.
- Smart Waste Management System:
  - ✓ Created a CNN-based waste classifier using TensorFlow and deployed it with Flask.
  - ✓ Transitioned into an Android app using Kotlin and TFLite for offline predictions.
  - ✓ Achieved 85% accuracy with real-time classification via CameraX API.

13. Please attach your detailed CV/Resume'

Dated: 30-Dec-2025

Signature of Applicant:

A handwritten signature in blue ink, appearing to read "Abhishek Jaiswal".
